

BluOS 2.12.0

The latest BluOS software, version 2.12.0, has a refreshing menu design that lets you browse by your favourite categories including artist, albums, and songs. Sort alphabetically or by release, or apply a filter that lets you only see the music you want to hear. Discover new up-and-coming artists, explore handcrafted playlists from music experts, or find the perfect playlist for any mood, with TIDAL categories like Rising and Moods now built right into the app. iTunes playlists can also now be imported directly into the app.

Software Requirements

BluOS Controller for iOS, version 2.12.0 or higher

BluOS Controller for Android and Kindle Fire, version 2.12.0 or higher.

BluOS Controller for Mac OS, version 2.12.0 or higher.
